Queries on Our Course

Q. How effective your postal course is?

A. Ours is a result oriented course, and is highly effective. We know that it works. The effectiveness of the course depends on whether you make use of the lessons and assignments. The degree of effectiveness would vary with factors beyond our control, such as the extent to which you make use of them - just as what happens when you go to university. So we cannot guarantee cent percent marks. But as far as we are concerned, we are absolutely convinced that this course is capable of helping you achieve *extremely good marks* provided you read it from first page to last page.

Q. Why I should join your postal course, why not book?

A. Well, this a very interesting question. You know, generally a book covers syllabus of all the engineering colleges in India to augment the sale of the book. In other words, books are not focused according to AMIE Examinations. So you have to put extra efforts to make notes from the book so as to make it useful for your purpose. In this process you waste your precious time. Novelty of our course is that it is focussed. Focussed on AMIE Examinations. And we stay focussed on it. We do not chase any other area. That is why our postal course is better than books as far as AMIE examinations are concerned.

Q. Would I face any difficulty studying this postal course by myself?

A. This is a self study course. And so this course is meant for those AMIE aspirants who are willing to study *on their own* - without being instructed by someone else. And our study materials make this quite easy to do. It is almost impossible that you face any difficulty understanding any topic. Here are the reasons: (i) the lessons do not use language that is unclear or confusing. Notes are written in simple English, easy to understand. They convey ideas from instructor's mind to your mind quickly, easily and accurately (ii) the topics the lessons deal with are well planned and well organized (iii) the lessons do not tell you things in a hurry or leave you wondering what they mean. They explain everything slowly and patiently (iv) the lessons anticipate the sort of difficulties you may run into while learning from them, and sort of queries and questions you may like to get answered. The lessons deal with these difficulties, and answer all these queries and questions thoroughly and completely.

Q. Is your fee reasonable?

A. Yes, of course. We have taken particular care and have made sure that the fee we charge is quite fair. In fact, the fee you pay is really nothing compared to the quality of the course you will be getting. And it's nothing compared to the future benefits you will be getting.
